Introduction

"It's estimated that in the UK a homeowner is attacked by a violent burglar every 30 minutes"

Henleys Security Doors manufacture & install beautiful residential internal & external wooden security doors with a concealed solid steel core. We also create complete safe rooms to protect you and your family or business.

*Sources: Daily Mail and The Telegraph

WHO ARE WE

We are a UK based security door & safe room business providing services across the United Kingdom with worldwide installation available for specific projects.

We specialise in replicating original door designs and transforming a space into a hidden secure room with an aesthetically pleasing entry.

Our bespoke manufacturing service creates beautiful solutions for both the interior and exterior, whether a standard, oversized or shaped door is required.

All doors are concealed with a steel core and hinged from a concealed steel frame, all of which are completely covered in timber and finished in a bespoke design of your choice.

THE NEED

With traditional home security easily bypassed and house alarms no longer attended to in many areas by the police, there was a need for a better solution.

We've worked with many victims to help them feel safe again after a traumatic event, such as coming face-to-face with an aggressive and violent intruder in their home. It's something no one should have to experience and our goal is to ultimately help homeowners be proactive and take control of their home security before an intruder decides to.

Henleys security doors ensure that every homeowner and their family have the precious time needed to call for help in safety within their home, in the event of a burglary.

RELIABILITY

We proudly passed the stringent Secure By Design police testing in 2015 and our doors are still made to the exact, robust design they were back then.

Our doors have achieved Burglary Ratings STS 202 BR1, BR2, BR3 and BR4 (LPS 1175 [SR] alternative) and tested to burglary rating standards by Element Testing House, one of the world's leading providers of testing calibration and advisory services.

With strict adherence to rigorous safety and testing standards and solid accreditation, choosing a Henleys security door is an easy choice if you are looking for reliable physical security solutions.

THE PROBLEM

WITHOUT A HENLEYS SECURITY DOOR

EXPOSED

Traditional methods of home security can be easily bypassed, even by unskilled intruders.

VULNERABLE

We are all at our most vulnerable while we are asleep, as we are unable to defend ourselves & our possessions.

ALONE

In many areas, house alarms are no longer attended to by the police, as they are low priority emergencies.

THE SOLUTION

WITH A HENLEYS SECURITY DOOR

SECURE

The intruder will not come face to face with you or your family if they gain access to your home.

STRONG

Our steel core doors and 42mm deadbolt locking mechanisms can withstand attacks from heavy weapons and tools.

SAFE

You can buy yourself valuable time to call for help or assistance in a safety within your home.

High Security Mock Sash Box Windows

DOOR FEATURES

Take a look at a sectional view of our doors and you'll see why they are so special. Product features are listed below:

- All manufactured right here in the UK.
- Anti drill, anti snap, anti bump, 3* security door barrels.
- Bespoke match service, timber finished.
- Hidden internal steel core layer, no steel on show.
- Security mounted hinges with security bolts.
- Reinforced Steel, Timber concealed Door Frame.
- Up to 12 point locking system.
- Doors come tested up to a BR4 rated burglary resistance.
- Bullet proof options available

SECONDARY GLAZED WINDOWS

Secondary glazing can be an extremely effective and efficient way of improving home security. It involves installing a 'secondary' window i.e. a fully independent internal window on the inside of your existing primary window.

WHY CONSIDER SECONDARY GLAZING

Secondary Glazed Windows provide an additional layer of security to your home.

These extremely robust steel frames on our secondary glazed windows firmly close with three locking points.

The range of glass that can be used within the secondary glazed windows ranges from anti-bandit security glass up to hammer resistant and ballistic mitigation glass.

All of these elements further strengthen your overall home security and help to lower the risk of forced entry and aggravated burglary.

To effectively create a safe space in your home, we recommend strategically placing security doors and windows throughout your home to create retreat areas. See more in sectional security on the next pages.

KEY BENEFITS & FEATURES

Peace of Mind

Adding an extra layer of security to keep intruders out.

Security Levels

We can incorporate security glass within the windows to accommodate your requirements from our range of options.

Bespoke

Can be manufactured to match the layout of your existing window.

Discreet

From the outside of the home, they cannot be seen as they have a thin profile.

Many Finishes Available

Can be finished in many colours to match existing windows.

Retrofit Installation

Can be installed into already lived in homes without causing any damage or disturbance.

SECTIONAL SECURITY

Henleys Security Doors

Forced Entry Point

WHY CONSIDER SECTIONAL SECURITY?

Sectional security can be used to create safe areas for you and your family. By using several doors it can effectively seal the intruder into one area of your home stopping them from coming face-to-face with you, while preventing further damage or theft.

On the diagram above you can see that we have recommended changing the downstairs hallway doors for our timber finished security doors. This in turn means when an intruder penetrates the property through a window, in the dining room for example, they will come up against one of our high security doors stopping them from gaining further access through the house.

KEY BENEFITS & FEATURES

Peace of Mind

Knowing you will not come face-to-face with a potentially violent intruder.

Sleep Soundly

Get a peaceful nights sleep knowing you and your family are safe behind our security doors.

Discreet

When you have guests within the home, they will not know you have security doors installed.

Simple yet Effective

Sealing an intruder off in one area stopping them from gaining access to other areas of the home.

Bespoke Designs

All of our security doors are manufactured bespoke meaning we can replicate your existing door designs.

Easy Process!

Simply send us the floor plans and we can recommend the best positions to install our high security doors.

PROTECTION LEVELS

There are 3 protection levels of security doors and windows to consider for this property.

LEVEL 1

Level 1 is for security door solutions that delay intruders for a matter of minutes and allow the clients to retreat to more secure areas of the home.

LEVEL 2

Level 2 is a solution that stops determined intruders that come armed with minimal tools to access the property and have some knowledge of the home / family / layout of the property. Level 2 can also be used to seriously delay professional intruders using larger tools.

LEVEL 3

Level 3 is a solution that stops professional aggressive intruders who arrive equipped with large tools from gaining access to the client and have a vast knowledge of the property layout.

INTERNAL SECURITY DOORS

Our bespoke internal security doors are made with a full steel core and steel frame which is concealed in a bespoke timber design to leave no steel on show. The steel core houses our high security deadbolt locking mechanisms which, when closed, are secured into the concealed steel frame giving maximum strength and security. Every security door is made to each customer requirement. Here are some examples of previous Internal Security Door installations:

**NO STEEL
ON SHOW!**

EUROPEAN OAK SECURITY DOOR

- Bedroom Security Door
- STS 202 BR2 Level 2 Viking Security Door
- American Oak Stained Black Finish
- Bespoke Match Service (replicated other standard doors within the home)

DOUBLE MASTER SUITE DOORS

- Double Doors to section off the entire master suite creating a safe retreat area.
- Double Doors that lock into the head of the door and the floor.
- Bespoke Match Service

WENGE SECURITY DOOR

- Remote property that required more security
- STS 202 BR4 Level 4 Spartan Safe Room Door
- Single Internal Bedroom Security Door

- Polished Chrome Door Hardware

HARDWOOD SECURITY DOOR

- English Heritage Estate in the Countryside
- Polished Brass Door Hardware
- Single High Security Internal door
- Bespoke Solid Oak Door Design
- 4 Panel Raised and Fielded with Bespoke Handmade Bolection Mouldings

EXTERNAL SECURITY DOORS

Just like our internal security doors, Henleys external security doors have a full steel reinforced core that is completely concealed in timber. From the outside it looks exactly like a timber front door with no visible signs of any steel. All Steel cores and door frames are made from galvanised steel and all our timber panel surrounds are bespoke. With these elements combined it ensures an ultimate high quality construction and finish of all our doors. Here are some examples of our work:

**NO STEEL

- Bespoke Stain and Lacquered Finish to Match Previous Front Door

HIGH SECURITY GLAZED DOORSET

- Beautiful Family Home
- Anti-Bandit Security Glass that can withstand 20 Hammer/Axe Blows
- Double Door Combination
- Polished Chrome Hardware

SAFE ROOMS

Henleys specialise in installing bespoke and discreet Safe Room protection. We convert bedrooms, en-suites, bathrooms and wardrobes into safe areas to keep you secure should an intruder enter your home. Often called Panic Rooms, they provide you and your loved ones with a safe place to retreat in the event of an attack, until help arrives. Henleys are able to provide Safe Rooms to new-build projects or we can convert any existing room in your home into a safe room.

**NO STEEL
ON SHOW!**

SAFE ROOMS EXPLAINED

For most Safe Rooms there are 3 main areas of security:

- Walls, Floor and Ceiling
- Doors and Windows
- Alarms and Camera Systems

We offer 3 protection levels to choose from to suit your individual requirements:

VIKING PROTECTION

We reinforce walling with structural stud work at specific spacings, install tested steel works and finish with ply board, then plasterboard ready to be decorated. This is designed to protect against intruders with basic hand tools and is an excellent product for those clients looking for additional security protection.

SPARTAN PROTECTION

We add Henleys Level 4 walling to walls, floors and ceilings designed to protect against attacks from multiple tools including grinders, sledgehammers, hooligan bars, axes and other large hand tools. This walling protection is designed to protect against intruders that have pre-planned an attack and are looking to obtain valuable items or come into contact to harm a specific person.

BALLISTIC MITIGATION PROTECTION

We add bullet-resistant panels to walls, floors, doors and ceilings. Bullet resistant (BR) panels are manufactured to protect against a range of firearms. We offer BR protection ranging from 9mm handguns through to 357 & 44 Magnum and shotgun protection. We offer both lightweight and heavy-weight versions for different applications.

REPLICA INSTALLATIONS

Our Bespoke Match Service option is unique. We can match any style and design of door, so that your security door looks exactly the same as your current doors. See some of our replica match designs below, before and after installation.

TESTIMONIALS

PREVIOUS HENLEYS INSTALLATIONS

HOUSE MANAGER FOR UHNWF

“

From meeting and arranging our new doors, Henleys promised a great service but delivered much much more.

Meticulous surveying, friendly and professional admin, copy and production of the existing doors superb, passionate, committed installation team, a pleasure to have in your home.

If Henleys start a fan club we will be founding members, so will you if you engage with this wonderful company.

”

VULNERABLE HOMEOWNER

“

I became a widow three years ago and found that being in the house on my own at night was very stressful and caused me to have many sleepless nights. The thought of someone breaking into my home while asleep scared me so much. I then heard of Henleys Security Doors and decided to have one of their doors fitted on my bedroom. I must say it is amazing as I can now lock it with the knowledge that I am perfectly safe...

”

HOME INVASION VICTIM

“
Very pleased with the quality & installation of the door. We now feel secure & sleep well. Jason and Steve were very thorough from start to finish and went the extra mile to take our wishes into account. I would recommend Henleys to anybody who wants peace of mind for themselves and their family.
”

HOMEOWNER IN RURAL SCOTLAND

“
The security door installed by Henleys has provided peace of mind for me knowing that my family are safe, as I am away from home often due to work commitments. I am extremely pleased how Henleys were able to replicate my old door. I am very impressed with the strength and quality of the door and that I now also have a secure room to keep my valuables safe. Henleys are a friendly company to deal with and I am happy to recommend them
”

We are proud of every single door we fit and deliver only the highest quality with every single job we complete. We hope that the above examples help you to see how unique to each job our products and services are and allow you to place your confidence in Henleys.

FAQs

- WHAT MAKES A HENLEYS DOOR SO STRONG?

The unique hidden steel core to the door and a concealed steel frame with a timber finish.

- CAN PEOPLE TELL BY LOOKING AT A HENLEYS DOOR, THAT IT IS A SECURITY DOOR?

No. Once your Henleys security door is installed, there'll be no steel showing and the door will blend into your home like a normal door.

- WHAT IS THE PURPOSE OF A HENLEYS SECURITY BEDROOM DOOR?

A Henleys door can protect you and your family from intruders if they enter your home. It can be locked very quickly in an emergency situation keeping you safe being the door. You can also lock it from the outside to keep your valuables safe when you are away from the home.

- WHY IS A BEDROOM SECURITY DOOR AN ESSENTIAL MEASURE FOR HOME SECURITY?

Most of our customers have been subject to an aggravated burglary or have a fear of being subject to such an attack. They also generally want to protect themselves and/or their possessions. Whilst double glazed windows and doors make you feel safe, they are not very effective in stopping an intruder from gaining access to your home and you. If you become a victim of an attempted aggravated burglary and you are fortunate enough to have a Henleys security bedroom door installed, you will be safe until help arrives.

- WHAT ARE HENLEYS MODERN SAFE ROOMS OR SAFE BEDROOMS?

Henley's security doors and walls turn existing bedrooms or internal rooms, into a modern discreet safe rooms, complimented with modern alarms and phone technology. If you are subjected to a burglary, your bedroom security doors and walls will allow you enough time to call for help and wait for the authorities. Once installation has been completed, it will seamlessly blend with your interior, concealing your safe room.

- WHAT DOOR SIZES ARE AVAILABLE?

Every door is manufactured bespoke so we can cater for any door size.

- IS A HENLEYS SECURITY DOOR HARDER TO BREAK IN TO THAN COMPOSITE OR UPVC DOOR?

Yes. In general composite and uPVC doors are tested to a residential standard called Pas24 which is a low standard of break in testing, this usually consists of using screw drivers and chisels. Henleys Security Doors are tested to commercial standards. These are much tougher and use tools such as crowbars, hammers and axes.

- WHAT DOOR STYLES ARE AVAILABLE?

Every door is bespoke so we can manufacture almost any design and we can also replicate your current doors if required.

- CAN I FIT THE DOOR MYSELF?

Yes, if you are a carpenter or have a good knowledge of installing solid timber doors.

- HOW HEAVY IS THE DOOR?

Approximately 70 kg dependant on the timber type, however the weight of the door once installed is not too dissimilar to a hardwood entrance door.

- HOW LONG DOES IT TAKE FOR MY DOOR TO ARRIVE?

Generally 4-10 weeks from the date of an order, depending on the specification required.

Please do not hesitate to contact us for a discussion if you have any further questions
