

HENLEYS

Safe rooms, internal & external security doors

HENLEYS STORY

We are a family run company founded 2010 out of the desire to help people.

Steve, one of the founders of Henleys, his father passed away leaving his mother home alone in a large home, scared and alone. She asked Steve to make her bedroom door secure so she could lock the door and feel safe when home alone.

After testing everything available on the market Steve was not satisfied with what was readily available, everything either looked aesthetically pleasing but was not secure enough, or was very secure and unappealing and not suitable for a residential setting.

Steve and Jason - the original founders - set out on the task of developing a high security door that looked aesthetically pleasing to be suitable to be installed into a residential home but also withstand a forced attack from intruders.

We are the only UK manufacturer that specialise in UK tested and accredited bespoke security doors and safe rooms that are manufactured bespoke for a residential setting.

Introduction

"It's Estimated that in the UK a homeowner is attacked by a violent burglar every 30 minutes"

*Sources: Daily Mail and The Telegraph

WHO ARE WE

We are a UK based security door & safe room business providing services across the United Kingdom and worldwide if required.

We specialise in replicating your existing door design so that your new security door blends into the rest of your home surroundings.

Our bespoke manufacturing service creates beautiful solutions for both the interior and exterior of your home, no matter the door design or size required.

All doors are manufactured with a concealed solid steel core and hinged from a steel frame, all of which is concealed in timber design of your choice to replicate the door designs of your choice.

THE NEED

With traditional home security systems easily bypassed or in a lot of cases completely ignored and house alarms no longer attended to in many areas by the police, there was a need for a better solution.

We've worked with many victims of burglary to help them feel safe again after a traumatic event, such as coming face-to-face with an aggressive and violent intruder in their home.

This is something no one should have to experience and our goal is to ultimately help homeowners be proactive and take control of their home security.

Here at Henleys, we ensure that every homeowner and their family have the precious time needed to call for help in safety in the event of a burglary.

RELIABILITY

We proudly passed stringent Secure By Design police testing in 2015 and our doors are still made to the exact, robust design they were back then.

Our doors have achieved Burglary Ratings STS 202 BR1, BR2, BR3 and BR4 (LPS 1175 [SR] alternative) and tested to burglary rating standards by Element Testing House, one of the world's leading providers of testing calibration and advisory services.

With strict adherence to rigorous safety and testing standards and solid accreditation, choosing a Henleys security door is an easy choice if you are looking for reliable physical security solutions.

PROTECTION LEVELS

There are 3 levels of protection that our products can be manufactured to meet.

Level 1

Level 1 is for security door solutions that delay intruders for a matter of minutes and allow the clients to retreat to more secure areas of the home.

Approximate protection time - 2-5 minutes

Using basic hand held tools and body weight.

Level 2

Level 2 is a solution that stops determined intruders that come armed with hand held, everyday tools to access the property and have some knowledge of the home, family and layout of the property. Level 2 can also be used to seriously delay professional intruders using larger tools.

Protection time - 15 minutes of constant attack time

Against hand held tools such as hammers, crowbars, wedges, chisels and screwdrivers.

Level 4

Level 4 is a solution that stops professional aggressive intruders who arrive equipped with large tools from gaining access to the client and have a vast knowledge of the property layout.

Protection time - 30 minutes of constant attack time

Against large and powerful tools such as hooligan bars, axes, grinders and sledgehammers.

- Security mounted hinges with security bolts
- Reinforced Concealed Steel Door Frame
- Up to 12 point locking system
- Doors come tested up to a BR4 rated burglary resistance.
- Bullet proof options available

THE PROBLEM

WITHOUT A HENLEYS SECURITY DOOR

EXPOSED

Traditional methods of home security can be easily bypassed, even by unskilled intruders.

VULNERABLE

We are all at our most vulnerable while we are asleep, as we are unable to defend ourselves & our possessions.

ALONE

In many areas, house alarms are no longer attended to by the police, as they are low priority emergencies.

THE SOLUTION

WITH A HENLEYS SECURITY DOOR

SECURE

The intruder will not come face to face with you or your family if they gain access to your home.

STRONG

Steel core doors and 42mm deadbolt locking mechanisms can withstand attacks from heavy weapons and tools.

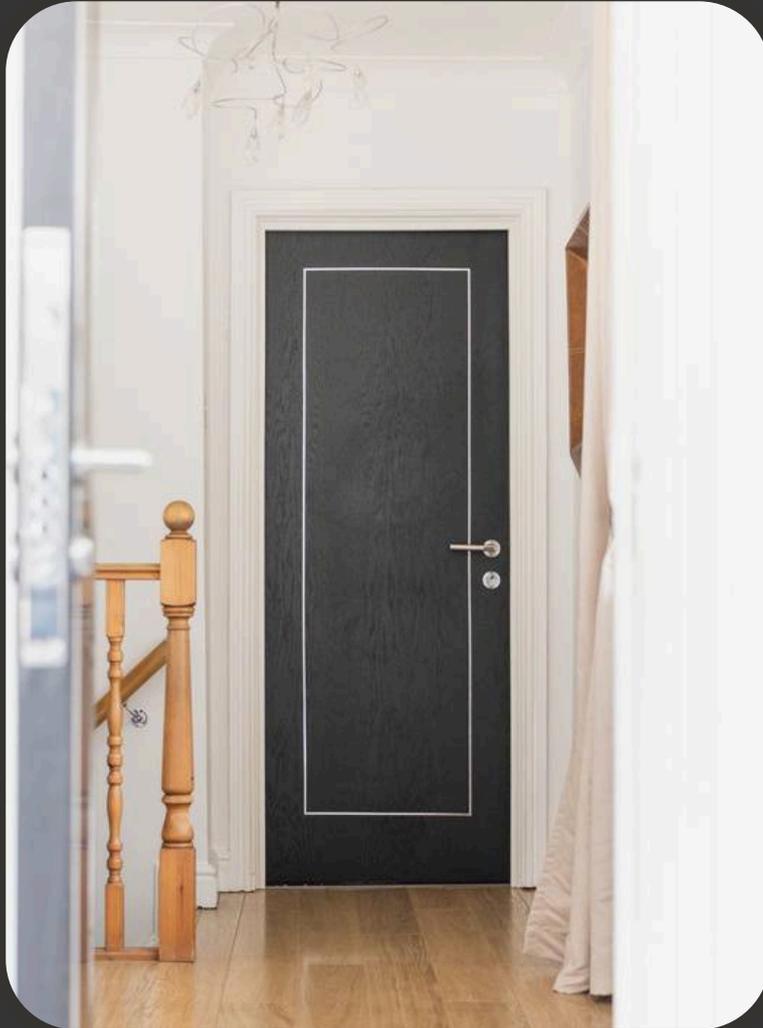

SAFE

You can buy yourself valuable time to call for help or assistance in safety.

BALLISTIC UPGRADE

All of our high security internal and external security doors can be upgraded to include ballistic mitigation.

All of our internal and external security doors can be upgraded to include NIJ IIIa ballistic mitigation panelling throughout the whole door and frame which protects against a 9mm handgun, 357 & 44 Magnum.

These doors are designed to be discreet and blend into your current home surroundings with no steel or ballistic panelling on show anywhere on the door or the frame.

The ballistic panelling is lightweight meaning the doors weight only increases slightly and is also very thin measuring around 2-3 mm in thickness so the overall door thickness only increases slightly too.

KEY BENEFITS & FEATURES

Peace of Mind

Knowing you will not come face to face with a potentially violent intruder

Sleep Soundly

Get a peaceful nights sleep knowing you and your family are safe behind our security doors

Discreet

The ballistic mitigation material is hidden within the core of the door and the frame and is completely hidden.

Simple yet Effective

The ballistic mitigation can protect against 9mm handgun, 357 & 44 Magnum

Bespoke Designs

All of our security doors are manufactured bespoke meaning we can replicate your existing doors

Easy Process!

Simply send us the floor plans and we can recommend the best positions to install our high security doors

AUTOMATIC SECURITY DOORS

We now offer automatic closing and locking internal and external security doors.

All of our internal and external security doors can be upgraded to be automatic.

Using the features below they can automatically shut and lock securing areas of the home remotely whenever deemed necessary.

These doors can be manufactured completely bespoke to match your existing door designs throughout the property meaning our high security door do not stand out at all.

These doors can be situated throughout the home meaning in the event of an emergency they can be remotely locked to shut off certain areas of the home to keep the family safe.

KEY BENEFITS & FEATURES

Operation

There are an unlimited amount of ways the automatic doors can be controlled and used in a home setting :

- When the alarm is triggered
- Upon pressing a dedication panic button
- Using a dedicated app
- Upon setting the alarm
- Fingerprint
- Key code
- Fob access

Simple yet Effective

Our automatic doors are discreet and blend into the home surroundings seamlessly

Easy to use

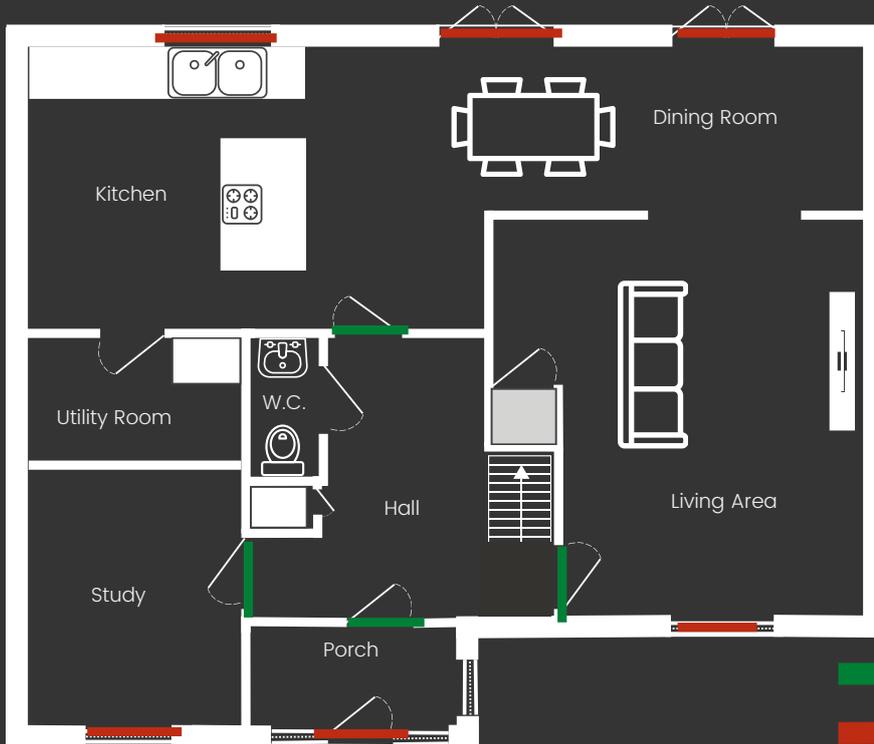

The doors can be designed to shut and lock simultaneously using the features to the left.

Peace of Mind

Knowing you will not come face to face with a potentially violent intruder

SECTIONAL SECURITY

Henleys Security Doors

Forced Entry Point

WHY CONSIDER SECTIONAL SECURITY?

Sectional security can be used to create safe areas for you and your family. By using several doors it can effectively seal the intruder into one area of your home stopping you from coming face to face with them and preventing further damage or theft.

On the diagram above, as you can see we have recommended changing the downstairs hallway doors to our timber finished steel reinforced security doors. This in turn means when an intruder gains access into the property through the window in the dining room for example, they will come up against one of our high security stopping them from gaining further access through the house and therefore stop them reaching the homeowners upstairs.

KEY BENEFITS & FEATURES

Peace of Mind

Knowing you will not come face to face with a potentially violent intruder

Sleep Soundly

Get a peaceful nights sleep knowing you and your family are safe behind our security doors

Discreet

When you have guests within the home, they will not know you have security doors installed

Simple yet Effective

Sealing an intruder off in one area stopping them from gaining access to other areas of the home

Bespoke Designs

All of our security doors are manufactured bespoke meaning we can replicate your existing doors

Easy Process!

Simply send us the floor plans and we can recommend the best positions to install our high security doors

INTERNAL SECURITY DOORS

Our bespoke internal security doors are made with a full steel core and steel frame which is concealed with a bespoke timber design. The steel core houses our high security deadbolt locking mechanisms which, when closed, are secured into the concealed steel frame giving maximum strength and security.

Every security door is made to each customer's requirements.

Here are some examples of previous installations:

**NO STEEL
ON SHOW!**

AMERICAN OAK SECURITY DOOR

- STS 202 BR2 Level 2 Viking Security Door
- American Oak Stained Black Finish
- Bespoke Match Service (replicated other standard doors within the home)
- Bedroom Security Door

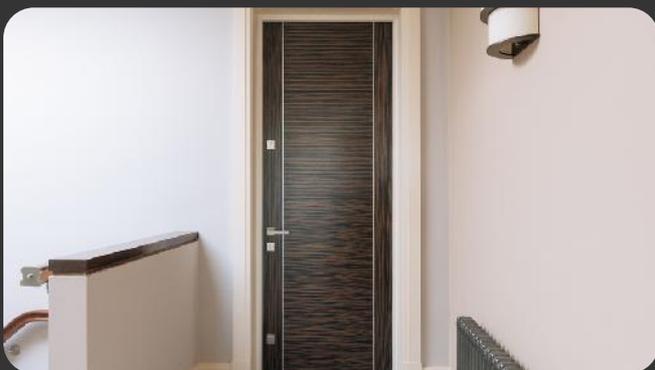

DOUBLE MASTER SUITE DOORS

- Double Doors to section off the entire master suite to create a safe retreat area.
- Double Doors that lock into the head of the door and the floor.
- Bespoke Match Service

WENGE SECURITY DOOR

- STS 202 BR4 Level 4 Spartan safe room door
- Single internal bedroom security door
- Cross grain Wenge door design

- Remote property requiring increased security

HARDWOOD SECURITY DOOR

- Polished Brass door hardware
- Single High Security Internal door
- Bespoke Solid Oak door design
- 4 Panel raised and fielded with bespoke handmade bolection mouldings
- English Heritage Estate in the Countryside

EXTERNAL SECURITY DOORS

Just like our internal security doors, Henleys external security doors have a full steel reinforced core which is concealed in timber. From the outside it looks exactly like a timber front door with no visible signs of any steel. All Steel cores and steel door frames are made from galvanised steel and all our timber panel surrounds are bespoke. These elements are combined ensuring the ultimate high quality construction and finish.

Here are some examples of our work:

**NO STEEL
ON SHOW!**

10 DOWNING ST DOOR DESIGN

- Arched Glazed Security Top Light
- High Gloss 10 Downing Street Door Finish
- 6 Bolt Lock System
- Polished Chrome Hardware with handmade Swarovski lever on rose

FRONT ENTRANCE SECURITY DOOR

- Internal Colour inspired by 'Friends' TV Show
- Dual Finish
- Bespoke Decorative Hardware
- London Terraced Townhouse

TRADITIONAL ENTRANCE DOOR

- Matt Black Hardware
- High Security Deadbolt Locking Mechanism with a 42mm throw
- Bespoke Stain and Lacquered finish to match previous front door

HIGH SECURITY GLAZED DOORSET

- Anti-Bandit Security Glass that can withstand 20 Hammer/Axe blows.
- Double Door Combination.
- Polished Chrome Hardware.
- Beautiful Family Home.

MOCK SASH BOX WINDOWS

Our mock sash box windows are designed and manufactured to replicate the design of a traditional sash box window.

Our high security mock sash box windows can be manufactured and installed to include a range of security glass from anti-bandit security glass, hammer resistant glass and ballistic rated glass.

Due to our meticulous eye, these windows look exactly like a traditional sash box window meaning they will be accepted by planning in order for you to replace the windows in your clients homes.

SECONDARY GLAZED WINDOWS

Secondary glazing can be an extremely effective and efficient way of improving home security. It involves installing a 'secondary' window i.e. a fully independent internal window on the internal room side of your existing primary window.

WHY CONSIDER SECONDARY GLAZING

Secondary Glazed Windows provide an additional layer of security to your home.

These extremely robust frames on our secondary glazed windows firmly close with three locking points.

The range of glass that can be used within the secondary glazed windows ranges from anti-bandit security glass up to hammer resistant and ballistic mitigation.

All of these elements further strengthen your overall home security and help to lower the risk of forced entry and aggravated burglary.

Our secondary glazed windows are a cost effective and hassle free way to improve your home security.

SAFE ROOMS

Henleys specialise in installing bespoke and discreet safe room protection. We convert bedrooms, en-suites, bathrooms and wardrobes into safe areas to keep you secure should an intruder enter your home. Often called panic rooms; they provide you and your loved ones with a safe place to retreat to until help arrives. Henleys are able to provide safe rooms to new-build projects or we can convert any existing room in your home into a safe room.

**NO STEEL
ON SHOW!**

SAFE ROOMS EXPLAINED

For most Safe Rooms there are 3 main areas of security:

- Walls, floor and ceiling
- Doors and Windows
- Alarms and Camera Systems

We offer 3 protection levels to choose from to suit your individual requirements:

MEDIUM PROTECTION

We reinforce walling with structural stud work at specific spacings, install tested steel works and finish with ply board then plasterboard ready to be decorated. This is designed to protect against intruders with basic tools and is an excellent product for those clients looking for additional security protection.

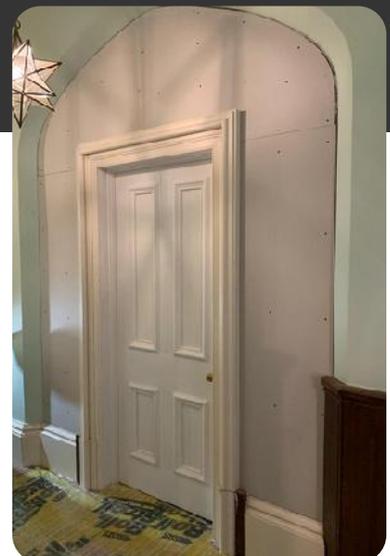

HIGH PROTECTION

We add Henleys level 4 walling to walls, floors and ceilings. Henleys steel security walling is designed to protect against attacks from multiple tools including hooligan bars, axes grinders and sledgehammers. This walling is designed to protect against intruders that have pre-planned an attack and are looking to obtain valuable items or come into contact with a specific person.

BULLET RESISTANT PROTECTION

We add bullet resistant panels to walls, floors, doors and ceilings. Bullet resistant (BR) panels are manufactured to protect against a range of fire arms. We offer BR protection ranging from 9mm handguns through to 357 & 44 Magnum and shotgun protection. We offer both lightweight and heavy weight versions for different applications.

REPLICA INSTALLATIONS

Our Bespoke Match Service option is unique. We can match any style and design of door, so that your security door looks exactly the same as your current doors. Below are some examples of our replica match designs below, before and after installation.

TESTIMONIALS

PREVIOUS HENLEYS INSTALLATIONS

HOUSE MANAGER FOR UHNW FAMILY

“

From meeting and arranging our new doors, Henleys promised a great service but delivered much much more.

Meticulous surveying, friendly and professional admin, copy and production of the existing doors superb, passionate, committed installation team, a pleasure to have in your home.

If Henleys start a fan club we will be founding members, so will you if you engage with this wonderful company.

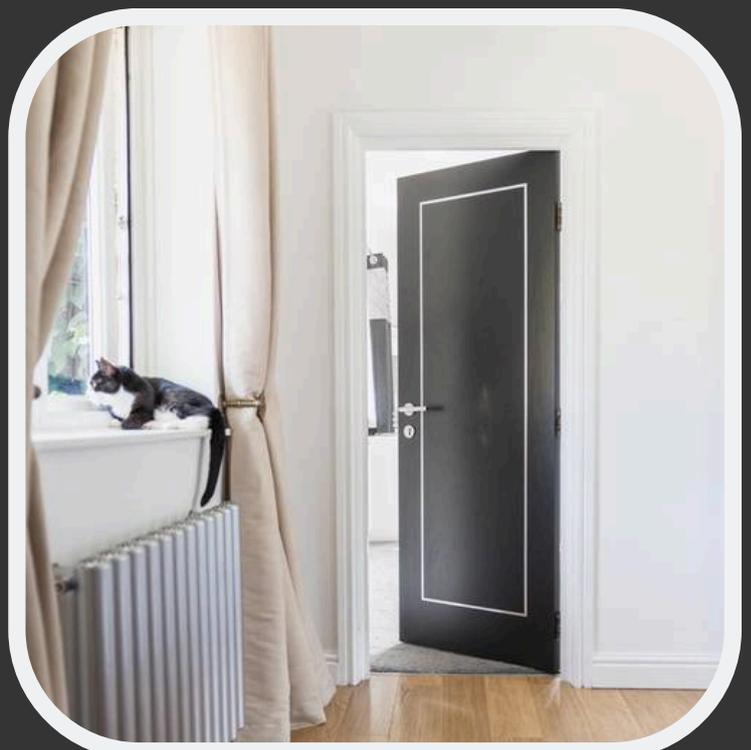

”

VULNERABLE HOMEOWNER

“

I became a widow three years ago and found that being in the house on my own at night was very stressful and caused me to have many sleepless nights. The thought of someone breaking into my home while asleep scared me so much. I then heard of Henleys Security Doors and decided to have one of their doors fitted on my bedroom. I must say it is amazing as I can now lock it with the knowledge that I am perfectly safe...

”

BREAK-IN VICTIM

“
Very pleased with the quality & installation of the door. We now feel secure & sleep well. Jason and Steve were very thorough from start to finish and went the extra mile to take our wishes into account. I would recommend Henleys to anybody who wants peace of mind for themselves and their family.
”

HOMEOWNER IN RURAL SCOTLAND

“
The security door installed by Henleys has provided peace of mind for me knowing that my family are safe, as I am away from home often due to work commitments. I am extremely pleased how Henleys were able to replicate my old door. I am very impressed with the strength and quality of the door and that I now also have a secure room to keep my valuables safe. Henleys are a friendly company to deal with and I am happy to recommend them
”

We are proud of every single door we fit and we deliver only the highest quality with every single job we complete. We hope that the above examples help you to see how unique each of our products and services are and allow you to place your confidence in Henleys.

CASE STUDIES

PREVIOUS HENLEYS INSTALLATIONS

DOUBLE GLASS SECURITY DOOR

“

This customer had two sets of double Level 2 security doors in their property. One set with P6b security glass and the other set were solid security doors. Both doors were designed and installed to be in keeping with the rest of their home.

”

10 DOWNING STREET REPLICA

“

This customer wanted a security door to stop intruders from gaining access into their property and to keep the residents secure within the building. They wanted their front door to match the 10 Downing Street door, so we did just that. Piano Black Mirror Finish. The security door was manufactured and installed within 9 weeks of the order being placed.

”

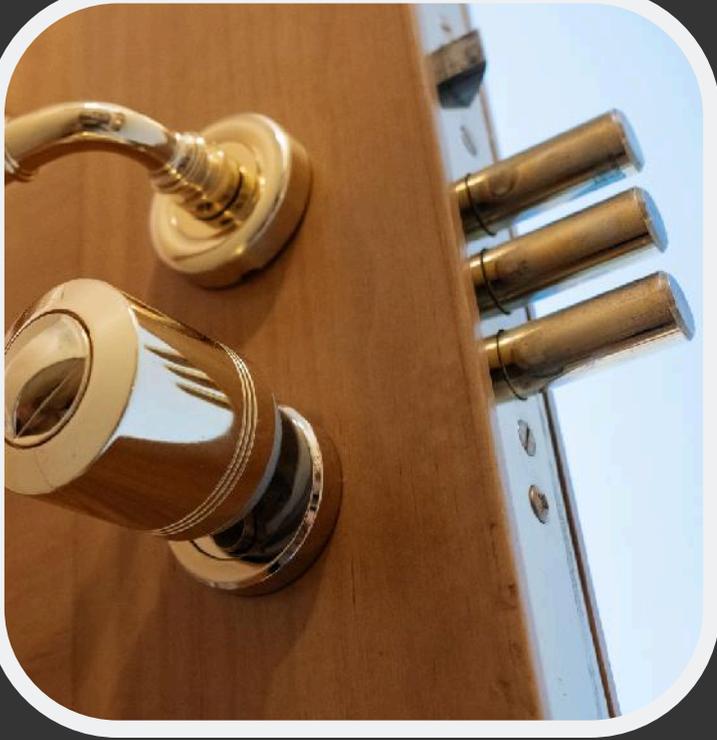

FREQUENT TRAVELLERS, KENT

“

This customer needed something discreet & strong to keep them safe whilst in the home & also protect their valuables when they travelled.

They chose Henleys as they wanted a wooden door & a bespoke match of their current door design & hardware. We recommended a Level 4 safe room door to create a safe room while they were home, especially while they are asleep, and a safe place to keep their valuables when they were away. We manufactured a replica design of their current bedroom door & matched the hardware.

”

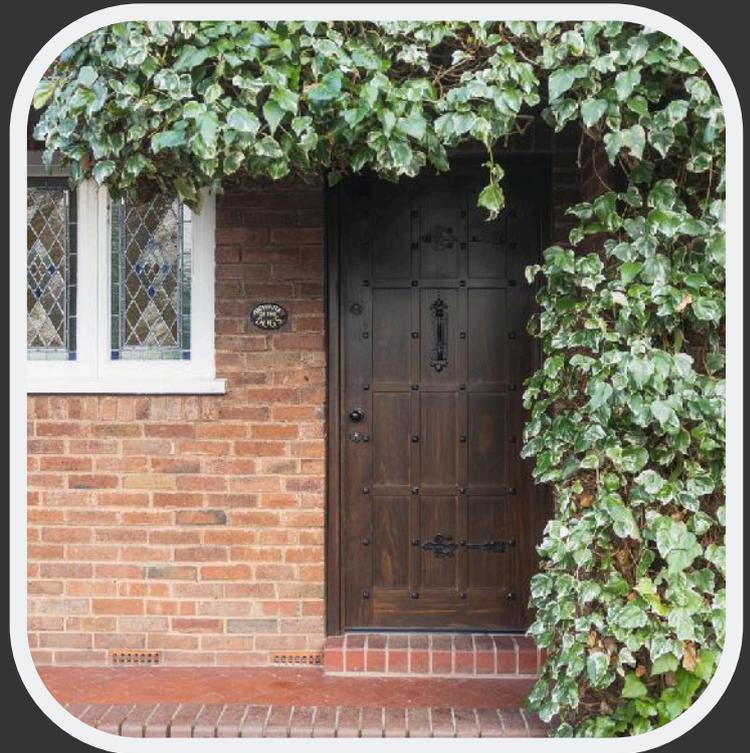

HOMEOWNERS, OXFORD

“

This customer wanted a perfect match to their original unique front door. They didn't think we could, but we did! This external Level 2 security door replica was manufactured & installed within 10 weeks and our clients were over the moon with the finished product.

”

We are proud of every single door we fit and deliver only the highest quality with every single job we complete. We hope that the above examples help you to see how unique to each job our products and services are and allow you to place your confidence in Henleys.

FAQs

- WHAT MAKES A HENLEYS DOOR SO STRONG?

The unique hidden steel core and steel frame in which the high security lock is held within.

- CAN PEOPLE TELL BY LOOKING AT A HENLEYS DOOR, THAT IT IS A SECURITY DOOR?

No. Once your Henleys security door is installed, there will be no steel showing and the door will blend into your home like a normal timber door.

- WHAT IS THE PURPOSE OF A HENLEYS SECURITY BEDROOM DOOR?

A Henleys door can protect you and your family from intruders if they enter your home. It can be locked very quickly in an emergency situation keeping you safe behind the door. You can also lock it from the outside to keep your valuables safe when you are away from the home.

- WHY IS A BEDROOM SECURITY DOOR AN ESSENTIAL MEASURE FOR HOME SECURITY?

Most of our customers have been subject to an aggravated burglary or have a fear of being subject to such an attack. They also generally want to protect themselves and/or their possessions. Whilst double glazed windows and timber doors make you feel safe, they are not very affective in stopping a determined intruder from gaining access to your home and you. If you become a victim of an aggravated burglary and you are fortunate enough to have a Henleys security bedroom door installed, you will be safe until help arrives.

- WHAT ARE HENLEYS MODERN SAFE ROOMS OR SAFE BEDROOMS?

Henley's security doors and safe room walls turn existing rooms, into modern discreet safe rooms, complimented with modern alarms and phone technology. If you are subjected to a burglary, your bedroom security doors and walls will allow you enough time to call for help and wait for the authorities. Once installation has been completed, it will seamlessly blend with your interior, concealing your safe room.

- WHAT DOOR SIZES ARE AVAILABLE?

Every door is manufactured bespoke so we can cater to any door size.

- IS A HENLEYS SECURITY DOOR HARDER TO BREAK IN TO THAN COMPOSITE OR UPVC DOOR?

Yes. In general composite and uPVC doors are tested to a residential testing standard called Pas24 which is a low standard of testing, this usually consists of using screw drivers and chisels. Henleys Security Doors are tested to commercial standards. These are much tougher and use tools such as crowbars, hammers and axes.

- WHAT DOOR STYLES ARE AVAILABLE?

Every door is bespoke so we can manufacture almost any design and we can also replicate your current doors if required.

- CAN I FIT THE DOOR MYSELF?

Yes, if you are a carpenter or have a good knowledge of installing solid timber doors.

- HOW HEAVY IS THE DOOR?

Our doors start at approximately 70 kg dependant on the timber type, however the weight of the door once installed is not too dissimilar to a hardwood entrance door.

- HOW LONG DOES IT TAKE FOR MY DOOR TO ARRIVE?

Generally 4-10 weeks from the date of an order, depending on the specification required.

Once completed, we are generally in your home for a day per door for the installation.

Please do not hesitate to contact us for a discussion if you have any further questions
